

SiVArc - Options of Automatic Visualization Generation (TIA-SIVARC)

Krótki opis

How do you achieve plant-wide standardization of the visualization of user interfaces with a significant reduction in engineering effort? With SiVArc – by automatically generating and creating visualizations based on the program code of the controller and visualization objects within the framework of overarching library concepts.

Cel szkolenia

You will configure a visualization generation step by step. As a basis for creating the visualization generation, a standardized PLC project and WinCC Unified is used.

You will deepen your theoretical knowledge through simple practical exercises on a SIMATIC system model. At the end of the training, you will be able to independently configure a complete visualization generation.

Grupa docelowa

- Programmers
- Configuration engineers
- Commissioning engineers

Opis szkolenia

- Demands on the PLC project in terms of standardization and structuring
- Planning an automatic visualization
- Automatic screen generation
 - Layouting
 - Navigation
 - Extended positioning
 - Overflow screens
 - Creation of pop-ups
- Dynamic generation of properties, events and animations for the visualization
- SiVArc expressions
- Troubleshooting and analysis of the generated visualization
- Demonstration of Openness Workflows

Wstępne wymagania dla uczestnika

Knowledge of SIMATIC STEP 7 and WinCC Unified in accordance with [TIA-PRO2](#), [TIA-UWCC1](#), [TIA-UWCC2](#)

Uwagi

In this course, you will work with the SIMATIC STEP 7 and WinCC Unified software based on TIA Portal.
