

PROFINET System Course (STEP 7 V5.x) (IC-PNSYS)

Ц е л и

Learn about the future-oriented PROFINET as the open Industrial Ethernet standard for automation from Siemens as a member of PROFIBUS International (PI).

Using SIMATIC NET components, you will learn how to parameterize, start up and troubleshoot a PROFINET network quickly and effectively.

Numerous practical exercises reinforce the theoretical knowledge acquired.

Ц е л е в а я г р у п п а

Programmers

Commissioning engineers

Engineering personnel

Maintenance personnel

Service personnel

С о д е р ж а н и е

Basics of PROFINET IO with configuring and programming

Basics of PROFINET RT&IRT and media redundancy

Plant-wide engineering & diagnostics with the engineering tools

Introduction to the integrated Web-services in the PROFINET devices

Utilizing and configuring Shared Devices and I-Device

Extensive practical examples with exercises

Т р е б о в а н и я к у ч а с т н и к у

SIMATIC S7 knowledge according to ST-PRO2 or ST-SERV2

Additionally an online entrance test is available for you. So you may assure that the course of your choice fits to your competences.
